

Project Management

Millennium EMS Solutions Ltd. (MEMS) project management services can successfully lead a project through all phases:

- Feasibility;
- Planning and design;
- Construction/ commissioning;
- Operations; and
- Decommissioning.

MEMS project management experience has led to the development of a detailed Prime Contractor Program. Major components of this program include:

- Contracts and contract management;
- Safety systems review and auditing;
- Detailed project communication protocols;
- QA/QC protocols;
- Financial management; and
- Variance tracking and change management protocols.

MEMS have direct experience in managing the following types of projects:

- Environmental regulatory strategies;
- Multi-site remediation projects;
- Development and implementation of environmental management systems;
- Environmental impact assessments; and
- Contaminated sites management.
